The Information Lag Problem

Institutional Edge

React to supplier disruptions within hours using proprietary intelligence networks.

Retail Disadvantage

Take days to respond, missing critical trading windows and opportunities.

Real Cost

Portfolio losses of 8315% due to delayed reactions to supply chain events.

The 2024 Red Sea crisis exemplified this gap 4 whilst institutional investors repositioned portfolios immediately, retail investors faced significant losses before information reached them.

Proposed Solution

MarketPulseX is a **multi-agent AI system** that autonomously discovers, validates, and predicts supply chain risks before they

Event Detection

Identifying potential disruptions in real-time

Impact Calculation

Quantifying the effects of disruptions across networks

Relationship Mapping

Mapping dependencies between suppliers and companies

Insight Generation

Developing actionable intelligence with confidence scores

How the Agentic Ecosystem Works

DataAgent

Ingests real-time news feeds and market data from multiple sources.

ExtractionAgent

Parses annual reports to identify supplier relationships and dependencies.

ValidationAgent

Cross-verifies events across sources to eliminate false signals.

GraphAgent

Maintains dynamic knowledge graph of supply chain relationships.

ImpactAgent

Calculates cascade effects and quantifies risk exposure levels.

AdvisorAgent

Generates explainable insights with actionable recommendations.

Key Features & Innovation

- ✓ **Fully Automated Relationship Discovery**
Extractssuppliernetworksfromannualreportswithout manual intervention.
- ✓ **Real-time Multi-Source Validation**
Cross-verifiéseventsacrossnewsfeedstoensureaccuracy and reliability.
- ✓ **Explainable Cascade Modelling**
Providesconfidencescoringandtransparentreasoning for every prediction.
- ✓ **India-first Focus**
DesignedspecificallyforNSE/BSEcompaniesandIndian market dynamics.
- ✓ **Built for Boutique Firms**
Democratisesinstitutional-gradeintelligenceforwealth managers and analysts.

Market & Business Model

Target Users

- Boutique Wealth Managers
- Independent Financial Analysts
- Small to Mid-size Fund Houses

Go-to-Market Strategy

1. Pilot with select wealth firms
2. Paid SaaS subscription model
3. API integration for platforms

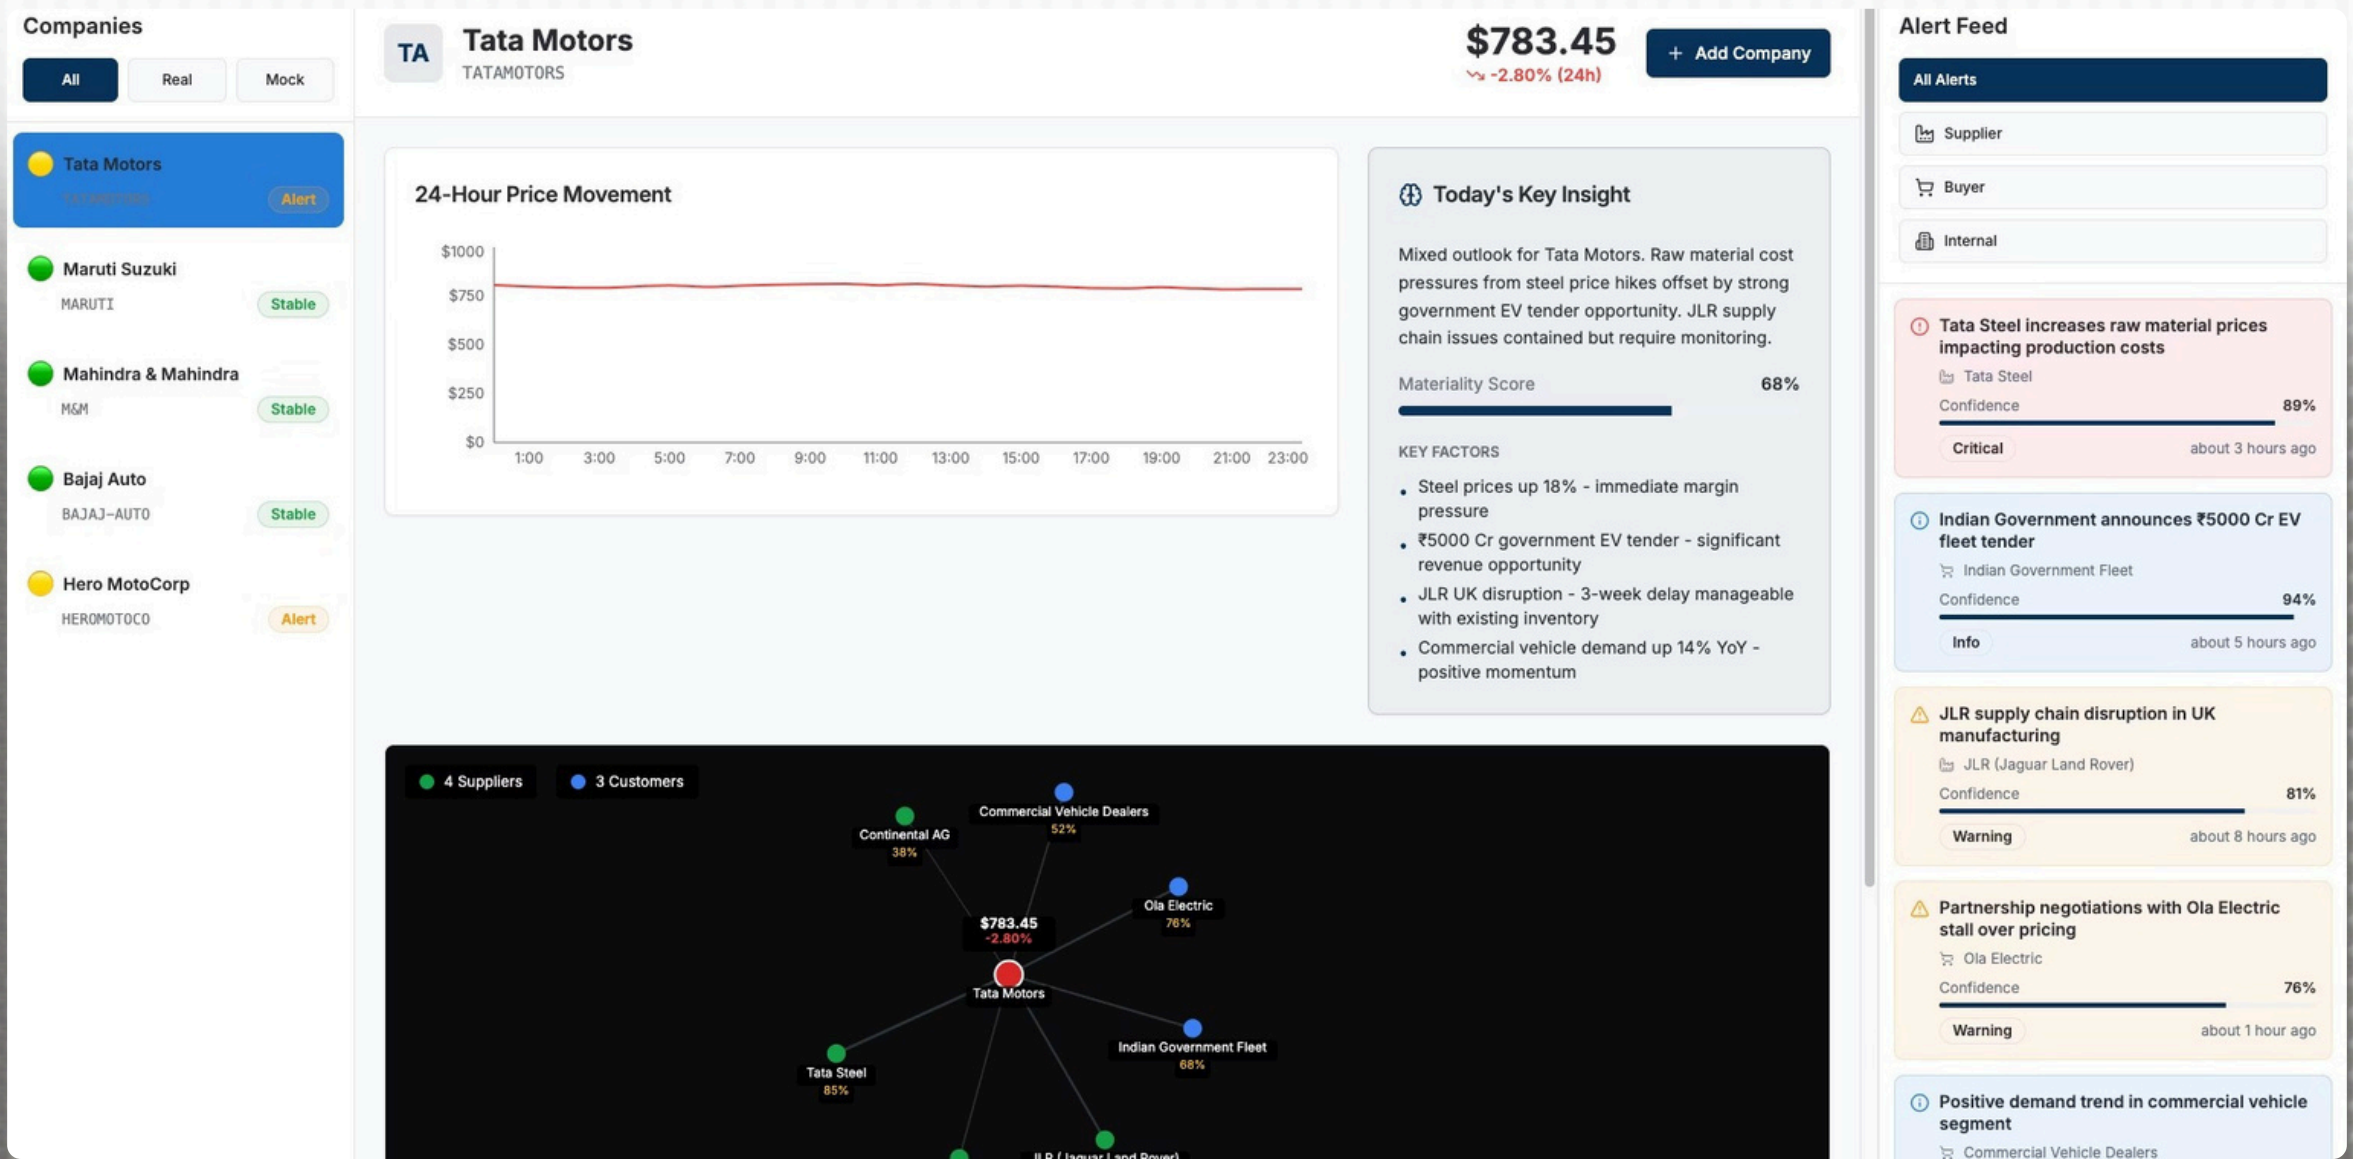

Pricing Tiers

Starter	125,000/month
Professional	175,000/month
Enterprise	1,50,000/month

Flexible pricing designed for firms of all sizes, with scalable features and API access at higher tiers.

Live Prototype Dashboard

Interactive dashboard displaying supply chain relationship graphs, real-time alert feeds, and AI-generated insights for Tata Motors. The system provides explainable predictions with confidence scores and actionable recommendations.

Why MarketPulse X Matters

24h

Reaction Time

Reduces market reaction lag from 7 days to under 24 hours.

10-15

Hours Saved

Saves 10315 research hours weekly per analyst through automation.

100%

Democratised

Brings institutional-grade intelligence to boutique wealth firms.

We're turning supply chain
complexity into financial clarity.
